

Section 1

C++

Starter

1. Programming language (tool)
 2. To solve problem you need to learn
 3. Algorithmic tools to solve real world problems
- Data Structures** (Containers that need to store data)
- Algorithms** (Techniques)

Learnings

Programming language C++
Programming foundations & Logical Thinking, Skills
Concepts - Loops, Branching, Arrays, Strings, Recursion
Bitmasking, OOPs

Curriculum Logic Building & Coding Essentials

S2 • Flow charts

S3 • Pseudocode

S4 Language Constructs

- Working with C++
- Branching
- Loops

S7 • Operators

S11 • Functions

S12 • Pointers

S13 • Arrays

S14 - 2D Arrays

S18 - char Arrays

S19 • Strings

S23 • Recursion

S24 • OOPS Basics

S6 • Variable, Datatypes

S8/S9 • Flow Control

S10 • Patterns

S14 • Sorting & Searching Basics

S15 • 2D Arrays

S16 • Pointers Vs Arrays

S17 • character Data Type

S19 • C++ Strings

S20 • Dynamic Memory Allocation

S21 • Vectors

S22 • Bitmasking Techniques.

No Pre-requisites to start learning programming

Logistics

Theory, Concept

Real coding

Notes

Practice coding Exercises

M.C.Qs

* IDE = Integrated Development Environment

✓ Online IDE and Offline IDE Setup

✓ Code Editor like VS Code, Turbo etc

✓ Platform
